

Corporate Facilities Engineering Program Total Solutions, When You Need Them

An Extension of Your Team

In today's business environment, adding members to your team can be an added expense you just can't afford. With Sali Group's Corporate Facilities Engineering Program (CFEP), you get well trained and experienced facilities staff when you need them – no need for full-time operations staff. You only pay for the services you need, when you need them. Our staff is on-call 24 hours a day and has experience in both production and facilities engineering.

CFEP Services

We understand that one size does not fit all. Your company's needs may be very different from other companies' needs. We tailor our program around your company to ensure that you get the most appropriate staff services when you need it.

We offer complete engineering department services. Our business is to serve as your facilities engineering department, including standards development, deferred maintenance programs and working with production in implementing lean manufacturing strategies. For IT-constrained sites, we can provide hosting services for your corporate facility standards, drawings, and specifications.

If you currently have an engineering department, we will gladly work with your team to support their efforts and fill any gaps that may exist – without adding headcount.

Our technical capabilities include:

- Engineering (mechanical, industrial, civil, CAD)
- Energy Systems (smart buildings, green buildings)
- Production (Fluid Management, Waste Management, Target Zero SM)
- Regulatory (ISO 14001, 9000, EMS, OSHA, Clean Air, SPCC, SWPP, others)
- Infrastructure (Deferred Maintenance Programs, upgrades)

Experience

Sali Group Programs are led by individuals with over 15 years experience in the engineering, regulatory and related fields. We have combined these resources into one group that focuses on complete Engineering Department Services.

Other Programs

Sali Group is a full service engineering company that partners with industry for long-term programs, such as CFEP or individual projects as required. Other services include:

- Potable/Process water audits
- Target Zero SM
- Construction Management
- Traditional Engineering/Value Engineering

If you are considering upgrades to your facilities, consider Sali Group.
