

Sali Group: Full Service Capabilities

Sali Group is an engineering firm focused on delivering business results while solving the challenges of facilities management and total resource optimization. A consortium of engineering professionals with an extended family of scientists and service providers, we develop tailored solutions hand-in-hand with our customers to meet their goals—and their budget—delivering benefits long after the project or contract service period is completed.

Approach

Our philosophical approach to the work we do everyday is based on our personal commitment to be good stewards of the Earth. Combined with our solid track record of delivering waste elimination and reduction results, we help our customers achieve long-term fiscal health by making their systems and facilities efficient.

Customers

Sali Group team members have executed projects at the following organizations:

- Food: Dean Foods, Frito Lay, Lipton, MMPA (Michigan Milk Producers Association), Sara Lee
- Manufacturing: Bendix Corporation, DaimlerChrysler, Delphi, Durakon Industries, Ford Motor Company, General Motors
- Municipal/Institutional: City of Los Angeles, Cranbrook Educational Community, Ira Township, Waterford Township
- Other: Clean Tech, City Management, DTE, Wacker Silicones

Services

We develop tailored solutions hand-in-hand with our customers to meet their objectives—and their budget—delivering benefits long after the project is completed.

Corporate Facilities Engineering Program

Sali Group specializes in industrial operations. Working with our customers, we focus our resources to maximize a facility's operating efficiency and reduce production down time. Our consortium of specialists offers a wide range of experience in all aspects of facility operations, energy management, wastewater and

physical plant maintenance. The Corporate Facilities Engineering Program (CFEP) is tailored to your facility needs ranging in services from complete turnkey facility engineering and maintenance to one time engineering projects.

physical plant maintenance. The Corporate Facilities Engineering Program (CFEP) is tailored to your facility needs ranging in services from complete turnkey facility engineering and maintenance to one time engineering projects.

Construction Management

Our key services in construction management are to provide our customers with comprehensive design and build services with onsite representation throughout the project cycle. The construction management experience of our industry leaders range from complex piping systems to major facility expansions and expedited repair and return of damaged equipment to service.

Target ZeroSM

Target Zero optimizes your facilities' resource (energy, water, chemicals) use practices, with the ultimate objective of zero waste. This translates into significant dollar savings.

Target Zero is a methodology to evaluate your minimum resource usage requirement, compare that to the current usage volumes, and modify system applications to minimize usages.
