

## Total Solutions, When You Need Them

### An Extension of Your Team

In today's business environment, adding members to your team is an expense you just can't afford. Sali Group's Corporate Facilities Engineering Program (CFEP) provides well trained and experienced facilities staff when you need them, eliminating the overhead of full-time operations staff. You only pay for the services you need, when you need them. Our staff is on-call 24 hours a day and has experience in both production and facilities engineering.

### Services

We understand that one size does not fit all. Your company's needs may be very different from those of other companies. We tailor our program around your company to ensure you receive the most appropriate staff services. We can provide complete engineering department services or work with your team to fill any staffing gaps.

As your facilities engineering team, we offer complete engineering department services including standards development, deferred maintenance programs and working with production to implement lean manufacturing strategies. For IT-constrained sites, we can provide hosting services for your corporate facility standards, drawings, and specifications.

If you currently have an engineering department, we gladly work with your team to support their efforts and fill any staffing gaps that may exist without adding headcount.

Our technical capabilities include:

- **Engineering:** mechanical, industrial, civil, CAD
- **Energy Systems:** smart buildings, green buildings
- **Production:** Fluid Management, Waste Management, Target Zero
- **Regulatory:** ISO 14001, 9000, EMS, OSHA, Clean Air, SPCC, SWPP, others

- **Infrastructure:** Deferred Maintenance Programs, upgrades

### Experience

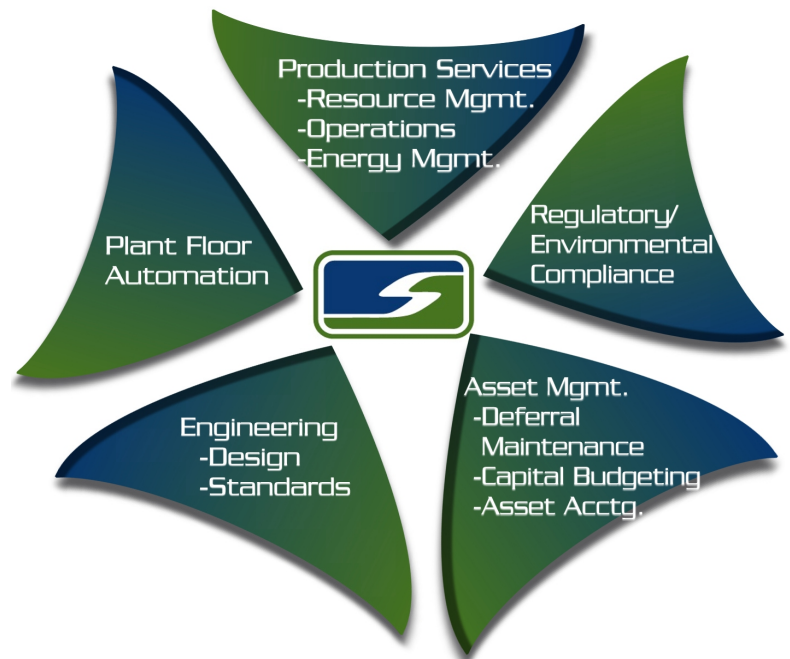

Sali Group Program leaders each have over 15 years' experience in the engineering, regulatory and related fields. We combined these resources into one group focusing on complete Engineering Department Services.

### Other Programs

Sali Group is a full service engineering company that partners with industry for long-term programs, such as CFEP or individual projects as required. Other programs include:

- Potable/Process water audits
- Target Zero
- Construction Management
- Traditional Engineering/Value Engineering

If you are considering upgrades to your facilities, consider Sali Group.
