

Sali Group is an engineering firm focused on delivering business results while solving the challenges of facilities management and total resource optimization. A consortium of engineering and environmental professionals with an extended family of scientists and service providers, we develop tailored solutions hand-in-hand with our customers to meet their goals—and their budget—delivering tangible benefits long after the project or contract service period is completed.

Approach

Our philosophy about the work we do everyday is based on our personal commitment to be good stewards of the earth's resources and the communities in which we work that promotes our clients vision and delivers robust sustainability outcomes and lasting content.

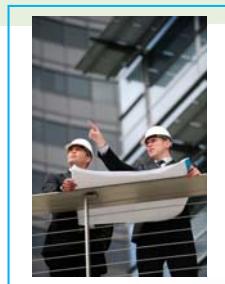

Customers

Sali Group team members have executed projects at the following organizations:

- **Federal Government:** US Army Tank Automotive Research, Development and Engineering Center, US Department of Homeland Security, US Postal Service
- **Industry:** Bendix Corporation, City Management, DaimlerChrysler, Delphi, DTE, Durakon Industries, Ford Motor Company, General Motors
- **Municipal/institutional:** City of Los Angeles, Cranbrook Educational Community, Farmington Hills, Waterford Township
- **Foods:** Dean Foods, Frito Lay, Lipton, MMPA Sara Lee

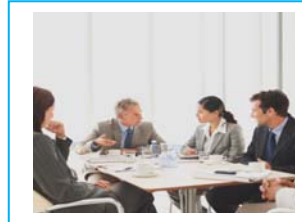

Services

Sali Group service offerings cover sustainability topics and issues including assessment, visioning, resource capitalization plan development, metrics, reporting and staff training.

Corporate Sustainability Programs

Sali Group specializes in industrial operations and facility management. Working with our customers, we focus our resources to maximize a

facility's total operating efficiency and combined operational cost saving.

Strategic Sustainability Consulting

provides organizations with the tools and expertise they need to actively manage their

economic, social and environmental footprint. We specialize in reinforcing existing company resources in developing and implementing sustainability plans and operational solutions equal to those of multinational corporations.

LEED® Consulting

Our key services in the LEED® Certification

process provides our customers with comprehensive design and construction knowledge including onsite representation. Our design and engineering experience ranges from energy and water audits and efficiencies to major facility construction projects including green infrastructure and on-going system reporting.

Labs 21® and Target Zerosm

Labs 21 encourages laboratories to make investments based on life cycle cost savings, pursue energy-efficient technologies, design systems that recover and exchange waste heat and other forms of free energy and incorporate renewable energy systems.

Target Zero optimizes your facilities' resource (energy, water, chemicals) to achieve zero waste.
